

There are SEVEN geocaches on Swans Island, plus THREE geocaches on Long Island.

As the Geocaching map indicates, there are also 3 more geocaches in Tremont, relatively close to the Bass Harbor ferry terminal.

TWO of the Swans Island geocaches are in the Lighthouse Park. These two caches are located very close to the trails, in safe locations. For your safety, **please stay on the trails as you look for the lighthouse geocaches**. You do not need to “bushwhack” to find these hidden treasures!

**Hockamock Island Cache     N 44° 08.068 W 068° 26.928**

This is a traditional Geocache located on the Long Point Beach Trail.

**Swans Island Lighthouse Park     N 44° 08.193 W 068° 27.045**

This is a 3-stage “multi cache”. The above coordinates will take you to the first cache of the “multi”, which is located near the trailhead in the valley. This cache contains the coordinates for the 2nd stage. The 2nd cache is located on the Summit Trail, and contains the coordinates for the final cache. The final cache can be found on the Burying Point Trail, close to the beach access to the Burying Point.

The other 5 geocaches on Swans Island are:

<b>Swans Island Special</b>	<b>N 44° 10.940 W 068° 25.211</b>
<b>Fine Sand Beach Cache</b>	<b>N 44° 09.320 W 068° 28.577</b>
<b>Noah’s Ballast (may be inactive, please check the website)</b>	<b>N 44° 08.666 W 068° 24.459</b>
<b>Recursive Island Cache</b>	<b>N 44° 08.947 W 068° 24.976</b>
<b>Swans Island Quarry Cache</b>	<b>N 44° 08.399 W 068° 25.914</b>

You will need a GPS to find all of the geocaches. However, sometimes people are able to find the caches without a GPS, either by accident or by design!

When you find a geocache, leave a note in the log, and take a trinket!
